Introduction

This material was collected by Dr Martin Eastwood during the course of his research and writing of 'A History of the Western General Hospital'. Little is known of the provenance of some of the original items such as the Craighleith Hospital photograph album (GD28/8/1) but it is assumed he was given them by the original owners.

The division into series is largely artificial as the original order of Eastwood's papers is not known.

The index is by speaker and title of talk. |

5 Western General Clinique Assessments, 1948-1961

These include assessments for each student in the year given with the assessor's (presumably Dr Card's) comments; students' bed allocations; list of the allocated patients with brief note on their conditions; and students' course criticisms. The files get briefer in later years. The photographs are of the students in Dr Card's clinics. Where there is a list, the names of Dr Card's students are underlined.

2 Box of rehoused photographic items, 1857-1995

These items were either framed or in three original envelopes. Unless the entry states otherwise, the photographs were in envelope 1. All the envelope 1 photographs were used in the book which also provided some title information. Page numbers in the book are also given. Most are copy photographs except where indicated so dates given are the date of the subject matter not the date the copies were made. Many of these are duplicated in GD28/8/3.
